

PRoF Award abstract – Call 2015

ATENDI

1. Research Outline

Acronym	ATENDI
Project name in English	ATENDI
Pitch (1 sentence)	ATENDI offers a centralized waiting list and referrals management-infrastructure for LTCF and Hospitals within Europe.
Executive summary (max. 10 lines)	<p>ATENDI provides and extended centralized infrastructure for patient-transfers between LTCF mutually and between hospitals and LTCF. The initiative is based on the Flemish Government' incentive for more data sharing within healthcare.</p> <p>Thanks to user identification, based on the SSN, patients can be filed electronically at multiple LTCF' waiting list simultaneously. This way LTCF get the benefits of a central waiting list system without the disadvantages of government centralized allocation.</p> <p>Every LTCF retains its own private queue, without being visible to competing facilities. Thanks to the underlying identification according to the SSN, double counting's or outdated care requests can be efficiently eliminated. This method achieves a more accurate waiting list per LTCF combined with a clever flow from hospitals, ultimately resulting in a more optimum utilization of available capacity.</p> <p>ATENDI is a perfect example of data sharing while maintaining autonomy in the admission policy.</p>

2. Cause and context of the research

ATENDI sets up a test pilot in the southern region of Limburg, in and around the Sint Trudo Hospital.

3. Innovation results achieved

ATENDI offers a more clever use of capacity within LTCF. With massive aging figures and accompanied need for long term care, every capacity utilization efficiency must be exploited.

4. Link to the PRoF values

ATENDI complies with the following PRoF values:

1. **Privacy** enabled data sharing for LTCF admissions.
2. Making LTCF admissions **less stigmatising** and more approachable thanks to electronical registration **solutions**.
3. Creating an **impactfull infrastructure** for Long Term elderly Care Facilities' admission management.
4. Based on a **durable business model** making the infrastructure sustainable for the long term.

ATENDI complies with three out of four PRoF innovation areas:

1. New insights regarding healthcare infrastructure.
2. Innovating healthcare processes and procedures.
3. Innovating healthcare products/services.

5. Applicable IPR rules

ATENDI is a registered trademark within the Benelux and filed with BOIP number 936316.

6. Information on the partners

ATENDI is a single-company initiative. Current contextual partners from the southern Limburg region pilot are: POP LISTEL and Sint Trudo Hospital.
